

Veer Pariawala

Web Developer & Graphic Designer

pariawalaveer@gmail.com

9833693702

Mumbai, India

github.com/VP45

I am a passionate person when it comes to designing and art. I've been a graphic designer for more than two years, been able to channel my innovative skills from Photoshop to Figma in the past couple of months in order to become a front end web developer. Being able to adapt to collaborative environments along with having a healthy working culture are one of the key attributes I bring along with me.

PROJECTS

BidBazaar (Auction-Bid website) (05/2023 - 05/2023) [↗](#)

- BidBazaar is an auction bidding website that offers a platform for buyers and sellers to participate in online auctions. With features like live chat, auction history, and a FAQ section for each auction, users can bid on a wide range of products, including tenders electronics, etc. Our ML models suggest initial auction biddings to the product owner, ensuring fair and reasonable bidding prices.

FlyCast (ML Based Website) (02/2023 - 04/2023) [↗](#)

- FlyCast is a website for Indian flight price predictions based on a customized search form, and having a trip planner along with it with the help of AI, and ease of use through the UI.

Cryptoverse (Redux Toolkit API based website) (02/2023 - 03/2023) [↗](#)

- Cryptoverse is a website solely based on Redux Toolkit implementation for API Queries, and is based on real-time crypto market data exchanges, rates, news and each crypto currency current value deviation with more features.

Kartify (E-commerce Website) (08/2022 - 10/2022) [↗](#)

- Kartify is an ecommerce website similar to Amazon, Flipkart and other websites, having features such as buying products, having payment gateway through Stripe, automated invoice generation and mailed to clients, along with more features.
